COMPANY PROFILE

ABOUT US

Divel Italia is an Italian company that designs and produces corrective and sunglasses lenses for the international eyewear market.

OUR VISION

At **Divel**, we prize excellence above all else. Whether it's our innovative techniques, our unparalleled craftsmanship, or our impeccable customer service, we always go well beyond the ordinary. We seek to inspire and to innovate, which is why we promote a culture of research throughout our organization.

OUR MISSION

It is our mission to become the leading benchmark for **innovative, high-quality lenses**. The beauty of our industry is that it is constantly evolving in the continuous pursuit of perfection.

As a brand, we find inspiration each and every day in the latest **innovations** and **technological developments**, and we channel this energy into all that we do.

COMPANY PROFILE

OUR HISTORY

CREATION OF DIVEL ITALIA

Our story begins more than half a century ago, after the end of World War II, in the heart of Italy's **Emilia Romagna region**.

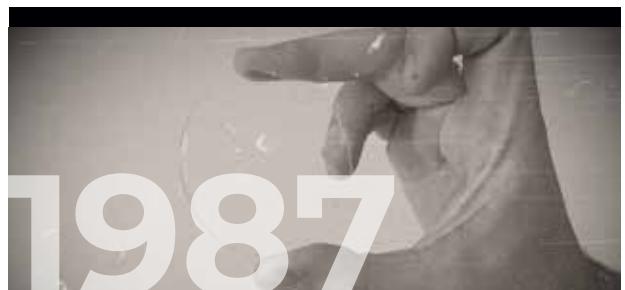

EXPORTING WITHIN EUROPE

In **1960**, we began exporting outside of Italy and soon made a name for ourselves in Europe in the production of sunglass lenses.

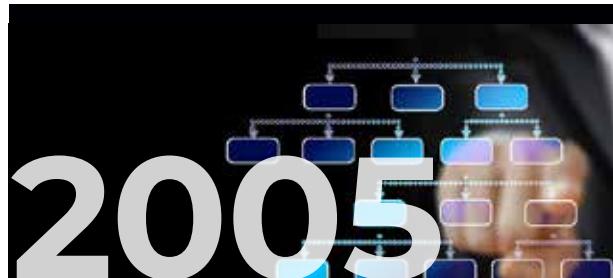

A TURNING POINT

By the **mid-1970s**, we had become one of Europe's leading producers of organic lenses made with CR-39 plastic, a revolutionary alternative to the original glass lenses.

NEW DEPARTMENTS

A radical reorganization of the company took place **in the 1980s** with the creation of three separate divisions: corrective lenses, sunglass lenses, and marketing.

THE NEW ORGANIZATION

Following the launch of our CR-39 lenses, Divel Italia continued to grow at a rapid pace, consolidating our positioning in the **Italian marketplace**.

THE FIRST SOFTWARE

The year **2010** marked another turning point for Divel Italia with the creation of our first lens developed entirely within our own research and development labs to give the world our **Aurora by Divel Italia progressive lens**.

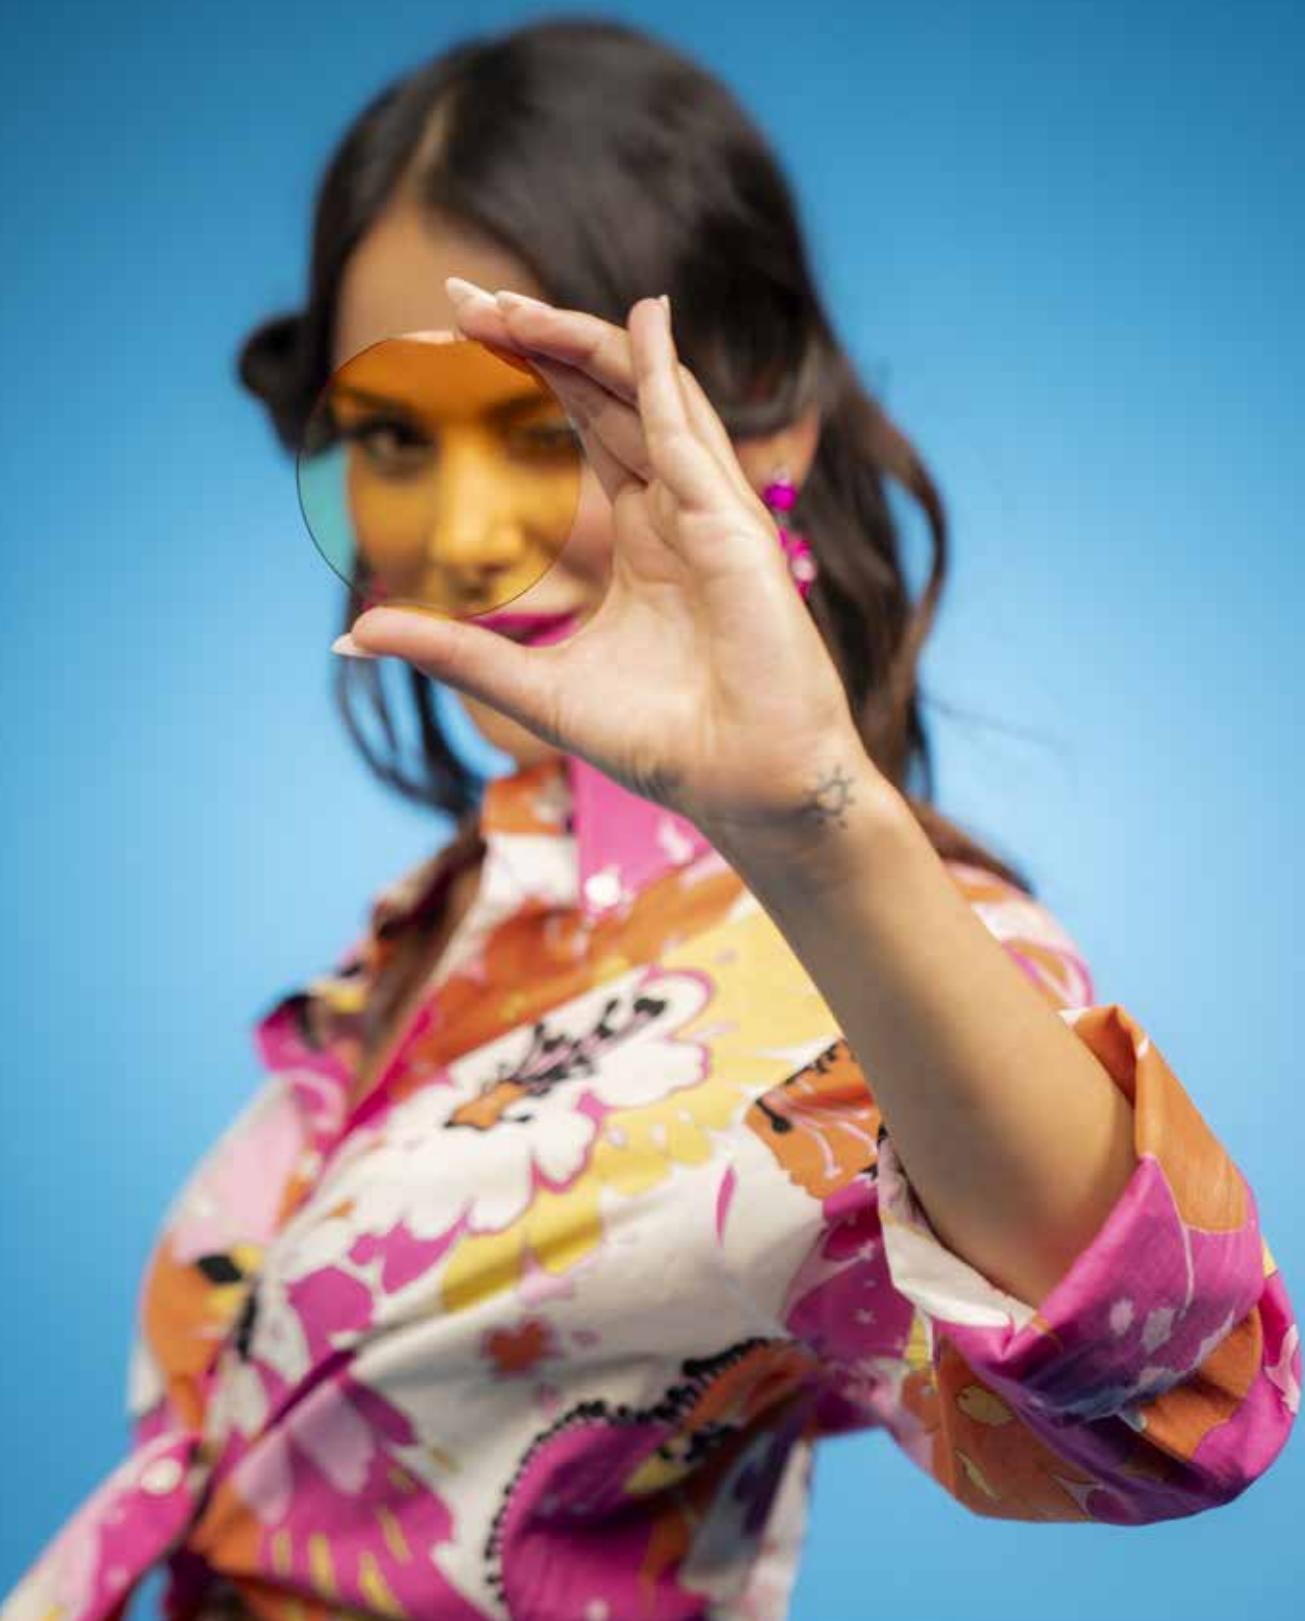

MODERN SOFTWARE

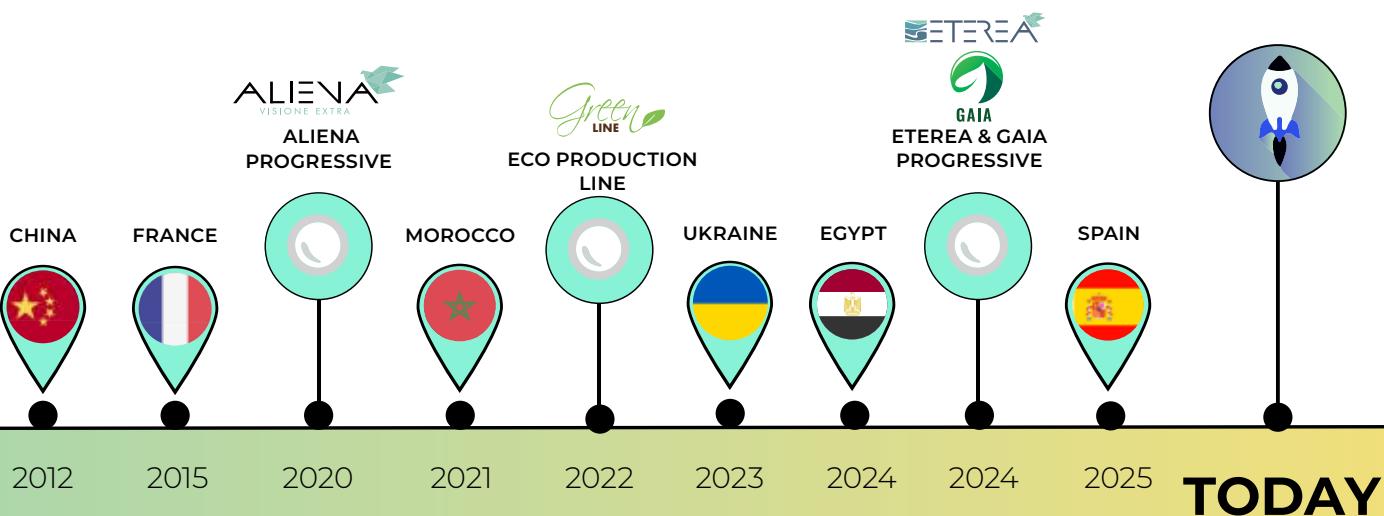

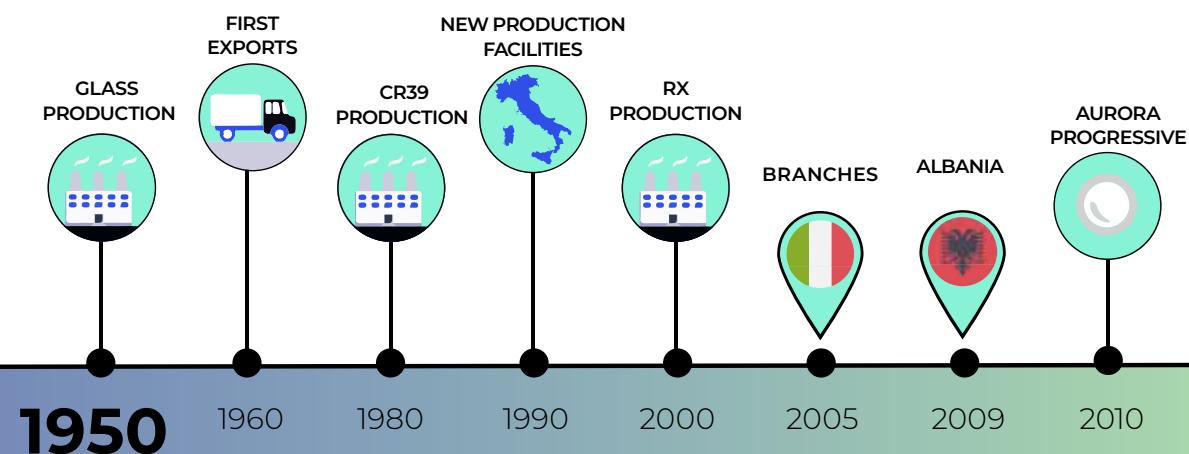

In **2020**, the innovative software is developed that will generate the **Progressive Alien** which will become the lens of the Super Top range.

In **2023**, however, the Etereia software was born which will make it possible to generate lenses with a design that adapts to the frame.

Divel **today** boasts 10 branches in Italy, 4 factories and 8 branches abroad and distributors worldwide. Divel is one of the main suppliers of sunscreens to fashion brands and a major player in the Italian ophthalmic market.

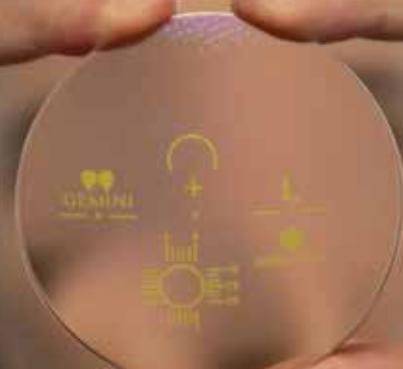

TIMELINE

ITALIAN BRANCHES

FOREIGN BRANCHES & FACTORIES

DIVEL ALBANIA

Our first foreign office for the production and distribution of our lenses in the **Balkan markets**.

SUN LENSES DEPARTMENT

The **Sun Lenses** creative department is the embodiment of passion, creativity, design and technology.

Each project is the result of an in-depth feasibility analysis and a study of **quality standards**.

Our team of experts assesses and guarantees the application of the laws and **regulations in force** (for corrective lenses, UV protection, etc.) and carefully checks the technical designs.

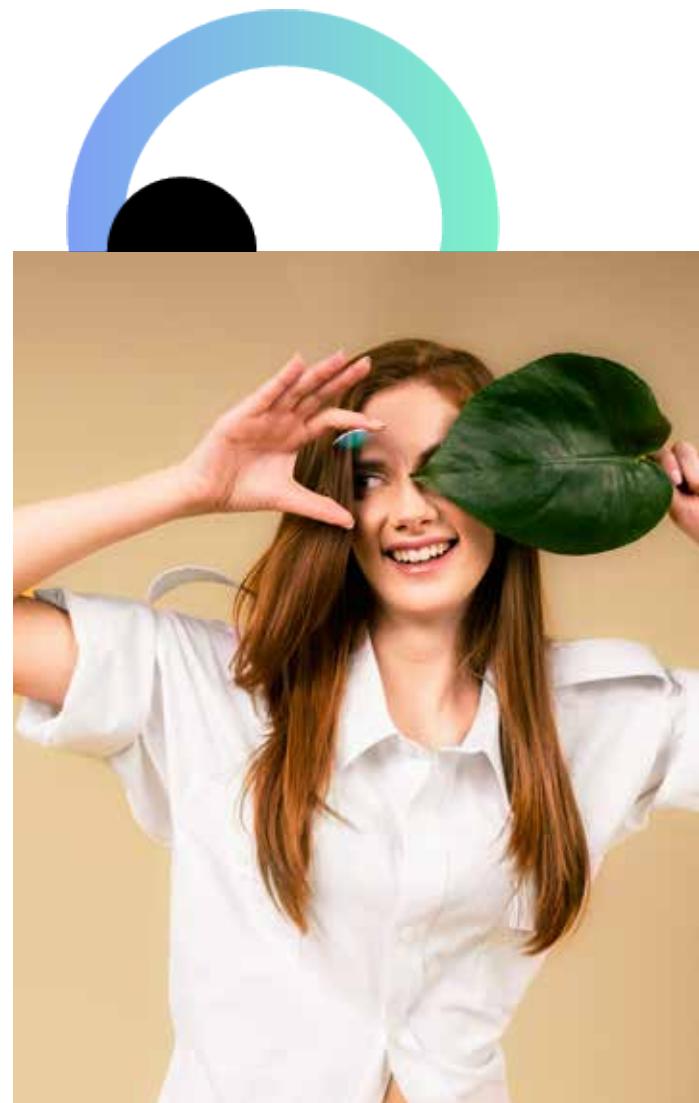

Each Divel collection begins with the creation of moodboards that convey the common threads of all our products.

ECO-SUSTAINABLE PRODUCTS

In recent years **Divel** has dedicated its attention to the development of projects aimed at minimizing production waste by optimizing its use. The **Divel Green Line** project has led to the birth of real eco-sustainable products that fit into an eco-friendly and green eyewear context.

COMPANY PROFILE

OUR VALUES

Throughout our history, we have pushed the envelope and often been the first to embrace and take advantage of **new technologies**.

We refuse to settle for anything less than excellence. **Quality materials, design purity, and distinctive styles** make Divel Italia lenses truly unique.

The beauty of our industry is that it is constantly evolving, which enables us to continue **learning** and **growing**. As a company, we are always excited about the latest innovations and technological developments.

We believe that product creation is as important as the finished product itself, which is why we ensure full transparency into our business practices. By embracing a **culture of honesty**, Divel has developed lasting relationships and loyalty with our customers.

We communicate **with you** as equals to ensure that you get the most reliable information possible and that you have confidence in our knowledge and advice.

QUALITY E CERTIFICATIONS

All our certifications are issued
